

## Titan R105

Properties	
Physical properties	
Titanium Dioxide, wt%.	92
Alumina, wt%, max.	3.2
Silica, wt%, max.	3.5
Carbon, wt%	0.2
Specific Gravity	4.0
General Properties	
Opacity Strength	Medium
Undertone Tint	Neutral
Weathering Resistance	Excellent
Dispersibility in: Plasticized Vinyl Dry Blending Operations	Very Good Excellent
Melt Compounding Operations	Very Good

### Application:

Production of PVC doors and windows

Production of industrial paints

Production of solar panels

Production of sunscreen creams

**ARKA**  
POLYMER
